

D3324A

Short Depth Process Meter

Features

DigiTec offers a NEW D3324A short depth process meter for applications where space is critical. The D3324A offers a 4½ digit meter at a very economical 3½ digit priced unit. The unit is easily scaled via zero and span adjustments on the back of the unit. A plastic cover snaps on the back of the unit after making your connections to the unit keeping your fingers away from live connections.

- Easily scalable into most engineering units
- IP65 Front Frame
- Finger Safe Cover Standard
- Programmable Decimal Point
- Display Range is -19999 to 19999
- 24 VDC Excitation Standard
- Short Depth Behind Panel

Specifications
